BLACK MIG WELDING GLOVES SUPERIOR PROTECTION FOR WELDERS

Experience superior protection and comfort with NEW Xcel-Arc Black MIG Welding Gloves. Featuring a heavy-duty internal fleece lining, these gloves offer enhanced warmth and comfort during welding tasks. The reinforced double-layered palm and thumb provide extra durability and protection where it's needed most. Made from durable split cowhide leather, these gloves are designed to withstand the rigors of welding, ensuring long-lasting performance.

ALUMINIUM MIG WIRE MARINE GRADE

XcelArc 5356 Aluminium MIG Wire is one of the highest quality aluminium welding wires available due to its consistent feed ability which is accomplished through the use of advanced wire drawing technology and a proprietary triple shaving process. 5356 is sometimes referred to as "marine grade" because it is widely used in the marine industry and it's very commonly found in general fabrication applications as well. The major element in 5356 wire is 5% magnesium. The wire has excellent weldability and corrosion resistance.

TIG WELDING TUNGSTEN ELECTRODES OPTIMIZED PERFORMANCE FOR EVERY WELDING CHALLENGE

Explore our range of TIG welding tungsten electrodes, tailored for various welding applications. Our E3 Non-Radioactive Tungsten electrodes are versatile and safe, perfect for both AC and DC welding, offering good arc stability and easy starts. For DC applications, choose our Thoriated Tungsten electrodes, known for their durability and high-quality welds on materials like stainless steel. For AC welding, particularly with aluminum and magnesium, our Zirconiated Tungsten electrodes provide stable arc performance and resist tungsten spitting. Each type is designed to cater to specific welding needs, ensuring precision and quality in your work.

All-in-one, High-quality Welder

- Pulse MIG welding delivers clean, high-quality welds with less spatter and a smooth, consistent finish.
- It offers better control of heat than standard MIG welding, helping reduce distortion and burn-through—especially on thinner materials.
- Although best known for aluminium welding, Pulse MIG also works extremely well on stainless steel and bronze. In many cases, it can achieve TIG-like results, but much faster and with higher productivity.
- Large, intuitive colour LCD screen for easy setup and control
- Easy machine setup with 15 synergic programs in standard, pulse, and double pulse MIG, manual MIG and spool gun modes
- Gas/Gasless ready to weld anywhere
- Heavy-duty gear driven wire feeder for smooth wire delivery
