TABLESS CELL TECHNOLOGY

The HiKOKI T-PWR Tabless Battery (BSL3640MVT) has been built with less internal resistance allowing for more power to flow from the tabless battery to the power tool increasing both the overload capacity and tool speed. The diagram shows the difference between HiKOKI's innovative T-PWR Tabless Cell vs. Conventional Cell. The power of the conventional cell gets bottlenecked at a single positive and negative tab while the tabless cell delivers free fast-flowing power with almost no resistance.
